Advanced CT scanner allows faster and more accurate diagnosis:

***Name-of-your-facility* NOW FEATURES NEW SIEMENS *SOMATOM*[®] *Sensation* for better diagnosis and more patient comfort**

City, State, Date – *Name-of-your-facility* has just added the *SOMATOM Sensation* scanner from Siemens Medical Solutions USA, Inc. to their radiology department. The new CT scanner improves diagnosis and treatment of patients in the *Name-of-your-region* region.

The new SOMATOM CT provides the finest image quality while reducing x-ray dose to the patient. Its innovative design provides optimal patient comfort by eliminating the closed-in feeling which patients sometimes associate with CT scanning.

“Our new CT scanner provides us with outstanding diagnostic information by enabling us to perform Multi-slice CT on a routine basis,” said *name, title*. “For example, we can now scan geriatric, pediatric and trauma patients in a single breath hold, which results in more accurate diagnosis while also reducing examination time and increasing patient comfort. It allows us to take care of our patients in the best way and in a patient friendly environment.”

The *SOMATOM Sensation* also allows the center to expand diagnostic services to substantially more patients in the region than ever before.
